

From the creators of
India's top No Code Program

AI Enablers

Cohort

Starting on September 12

A 15 + 15 day AI program for
non-tech folks to build with AI.

Cohort Booklet

Trust me, AI overwhelm is real

Tech jargons.
New AI tool every week.
The pressure of adapting.

The world is feeling it.

What if I told you that it's all just hype.

Building with AI is not hard!

**After 30 days, I promise that
you will use AI to build agents,
applications and automations.**

No tech background. No prerequisites.

You will learn in an environment that is
judgment-free, promotes 100s of questions
and focusses on building (not theory)

Testimonials

"Enrolling with Adi was one of the best choices I made. The return on investment is insane — design, tooling, databases, workflow logic and so much more."

Anshumaan Rath

"Being a complete novice, I got to learn so much. Aditya attended to every doubt individually — nothing felt intimidating after that."

Payel Banerjee
ARTIST

"I knew the tools existed, but you always need someone to actually get you started. Adi helped me build my websites from scratch, step by step. I went from overwhelmed to confident, and now I ship on my own."

Abhishek
Founder, EcoFlyp

"THE BEST LEARNING EXPERIENCE I have enjoyed till date. Never been a part of something so active, supportive and cheering. In Adi you'll find a brother, a friend, and a mentor — he'll make sure you do well throughout and beyond."

Aditya Gupta

"Aditya made every concept so clear and simple that I actually learnt to build things from day one. It felt like a comfortable space to ask anything without hesitation."

Nandini Mittal

Adi

AI Builder & Educator

Meet your Mentor

Hi, I am Adi.

There's a huge difference between knowing how to build & teaching how to build.

I wanted to be a good teacher. Who would take a complex topic and simplify it for everyone.

After mentoring 2000+ students, I devised the care-first approach of teaching.

Where nobody feels overwhelmed or intimidated while learning. Everyone is welcome!

We stay with you during and after the program. Because we care about your journey.

I've worked with Microsoft Ads, Big Bang Theory, RushTix etc during the Covid-era

The Founder of Era of No Code where we taught 2000+ students how to build without coding.

Built large-scale products in the field of education & property-brokerage in the US

Conducted an all India Tour for No Code education and created a 30-day global sprint

Topics

Claude Code & Cowork

Your AI journey starts here. We will start going beyond chats

Use Cases: Use Cowork for research, making PDFs and automating work

Build your website & applications

We start by creating websites and web applications - the right way

Use Cases: Make landing pages and multi-paged website for your business

Designing your Database

We will learn how your data is stored for a long time.

Use Cases: Learn how to store your customer data, your product data etc

API, Webhooks & MCPs

Connect with WhatsApp, Telegram, Gmail & other 3rd party services

Use Cases: Automate a workflow when your customer messages or when you get an email

Adding OAuth & Payments

Accept Payments & Let your user sign up with Google.

Use Cases: Take payments for your products or run a workflow after payment is done

Building your AI Agents

Make AI Agents that do your work

Use Cases: Make agents that do market research, keep a sales score, make daily content, does competitor analysis etc.

Topics

Skills, Hooks & Commands

Essential Claude Code concepts

Use Cases: Make better designs, better documents and better workflows

Make your Personal OS

Where agents + knowledge meet

Use Cases: Make a system that knows about you, your business and does the work for you

Prompt, Context, Loop & Graphs

Make your AI workflows better

Use Cases: Various techniques such that you get better results while using AI

Theory of RAG

Store large businesses' data

Use Cases: Imagine having large documents & excel sheets. This is where you'll build workflows for large businesses

**Beyond this, you'll have access to
100+ Videos inside the AI Vault for 3 months**

Format

Day 1 to 15 → Learning core AI Building Concepts

This is when your live classes start & you get access to our 100+ Video Vault

Week 1

Saturday & Sunday may seem long.
Just a matter of 2 weeks, I promise :)

Saturday	10AM to 12 Noon	Class 1
	8PM to 9PM	Class 2
Sunday	10AM to 12 Noon	Class 3
Wednesday	8:30 to 9:30PM	Class 4
Thursday	8:30 to 9:30PM	Class 5

Coworking + Doubt Session on other days from 8 - 9PM

Week 2

Saturday & Sunday may seem long.
Just a matter of 2 weeks, I promise :)

Saturday	10AM to 12 Noon	Class 6
	8PM to 9PM	Class 7
Sunday	10AM to 12 Noon	Class 8
Wednesday	8:30 to 9:30PM	Class 9
Thursday	8:30 to 9:30PM	Class 10

Coworking + Doubt Session on other days from 8 - 9PM

Week 3

Saturday	10AM to 12 Noon	Class 11
Sunday	10AM to 12 Noon	Class 12

Coworking + Doubt Session on other days from 8 - 9PM

**Day 16 to 30 → Complete focus
on building**

Week 3 onwards

This is where you build one of these:

**An AI Project for
your business**

**An AI System
for your team**

**An AI project for
our partners**

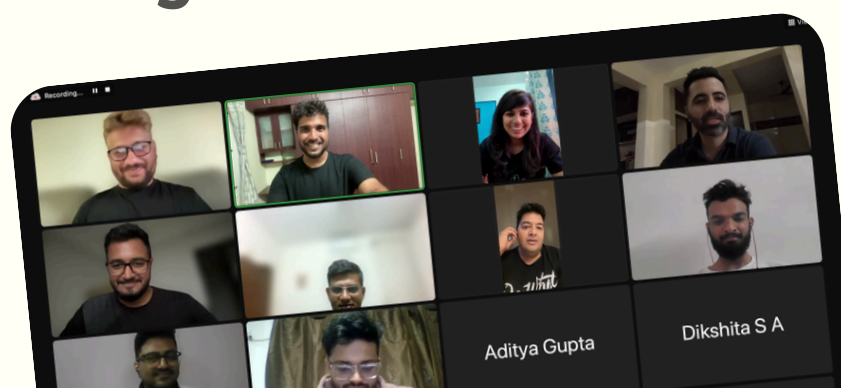

You select your route.

**We will help you
all the way.**

Coworking + QnA Session

Mon, Tuesday & Friday

8 to 9PM

Testimonials

"Adi was a great person to learn from — patient with every stumble, knowledgeable enough to go beyond the scope of the bootcamp whenever I needed it."

Apoorv Dwivedi
DIGITAL MARKETING HEAD, HERBAL STRATEGI

"Live assignments on the call gave a hands-on idea of how to actually build. Even if you're a beginner with zero clue about app development — learning it with Adi is a cherry on the cake."

APM at Zoho
ANONYMOUS

"Craziest experience ever — to learn something damn practical, not by listening but by doing. Got the dopamine hit of gaining the confidence to build anything."

Prashant Nayak

"The way Aditya structured every session and walked through each concept was amazing. Got to learn a lot of genuinely new things, and the whole experience was very empowering."

Pranav Pawar

"Aditya's depth of knowledge is unmatched and his teaching style is both engaging and effective. The gamification of the whole experience pushed everyone to perform their best."

Kritika Singh

"The sessions are incredibly engaging and properly hands-on. Adi patiently explains every concept and makes sure non-tech folks keep up at every step."

Haridher Pandyan

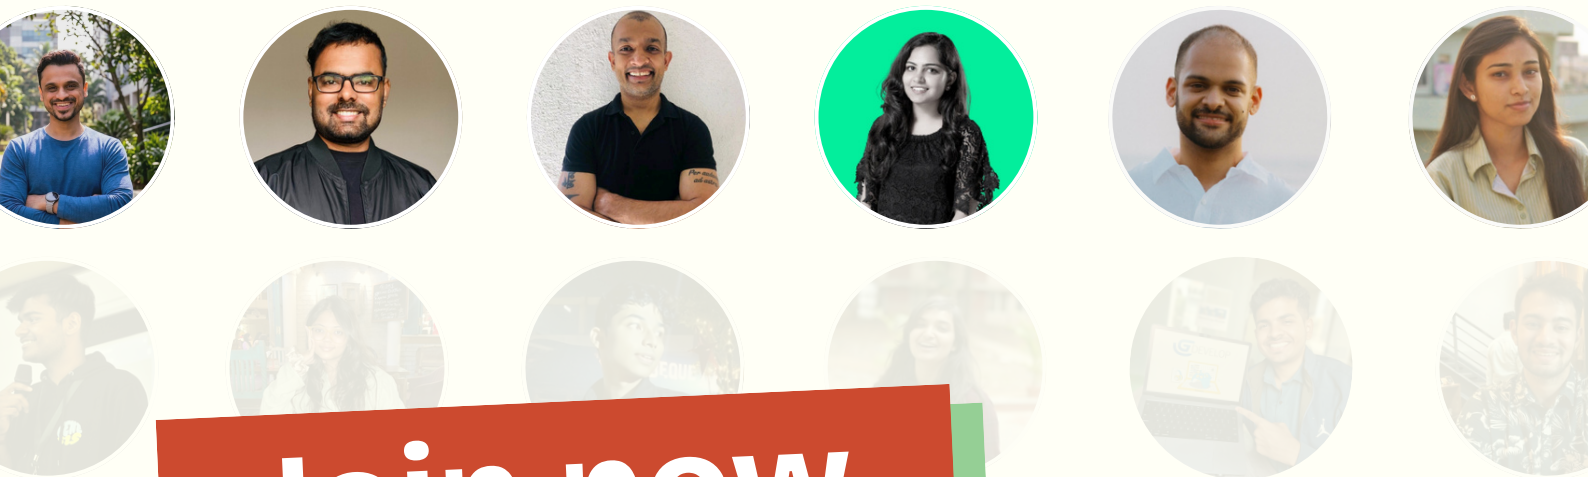

"Bite-size lessons, packed with value. Way more than I expected to walk away with. Adi is a fantastic builder, mentor, and teacher all rolled into one."

Karan S

"Not just another course — solid skills around building real products, plus the best community of practitioners and a great amount of valuable connections."

Prem Patel
